Sprucegrove International Equities

JUNE 30, 2026

Sprucegrove's strategy employs a value approach to the management of equities. It emphasizes long-term investment, and it focuses on the selection of individual securities using a bottom-up, research driven approach. Country and sector exposures are a residual of this stock-selection process. We seek to invest in securities that meet our standards of investment quality including a history of above average financial performance, a secure financial position, reputable management, and a growth opportunity in terms of sales, earnings, and share price. Our valuation criteria includes normalized price earnings multiple, price to book and dividend yield.

[1]**Sprucegrove International Pooled Fund**. Inception date of Fund: April 30, 1985. Fund performance reflects a linking between the Sprucegrove International Pooled Fund and the Confederation Life International Pooled Fund for periods prior to 1994 (for which the Sprucegrove Investment Management team managed the portfolio since its inception).

[2]Net returns reflect Gross returns reduced by management fees and withholding taxes associated with any dividends paid, where imposed by certain jurisdictions.

[3]**The MSCI EAFE (net)** was launched on March 31, 1986. Data prior to the launch date is back-tested. It is the benchmark for the Sprucegrove International Pooled Fund. All supplementary indices are presented for comparative purposes only.

[4]**The MSCI EAFE Value (net) Index** was launched on December 8, 1997. Data prior to the launch date is back-tested.

Back-tested performance, (i.e. calculations of how the index might have performed over that time period had the index existed) which is hypothetical and not actual performance, is subject to inherent limitations because it reflects application of an Index methodology in hindsight. No theoretical approach can take into account all of the factors in the markets in general and the impact of decisions that might have been made during the actual operation of an index. Actual returns may differ from, and be lower than, back-tested returns.

The MSCI EAFE (Net) Index and The MSCI EAFE Value (Net) Index captures large and mid cap representation across 21 developed markets, excluding the US and Canada. The Indices are the arithmetical average, weighted by market value of the performance of companies representing the stock markets of Europe, Australasia, and the Far East. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. Index information is provided for illustrative purposes only and is not intended to imply past or future performance. Please note an investor cannot invest directly in an index. Unless otherwise noted, index returns reflect the reinvestment of income and dividends, if any, but do not reflect fees, brokerage commissions or other expenses of investing. The volatility of an index may be materially different than that of the portfolio, and investors should not expect the portfolio to achieve the same results as a listed index.
